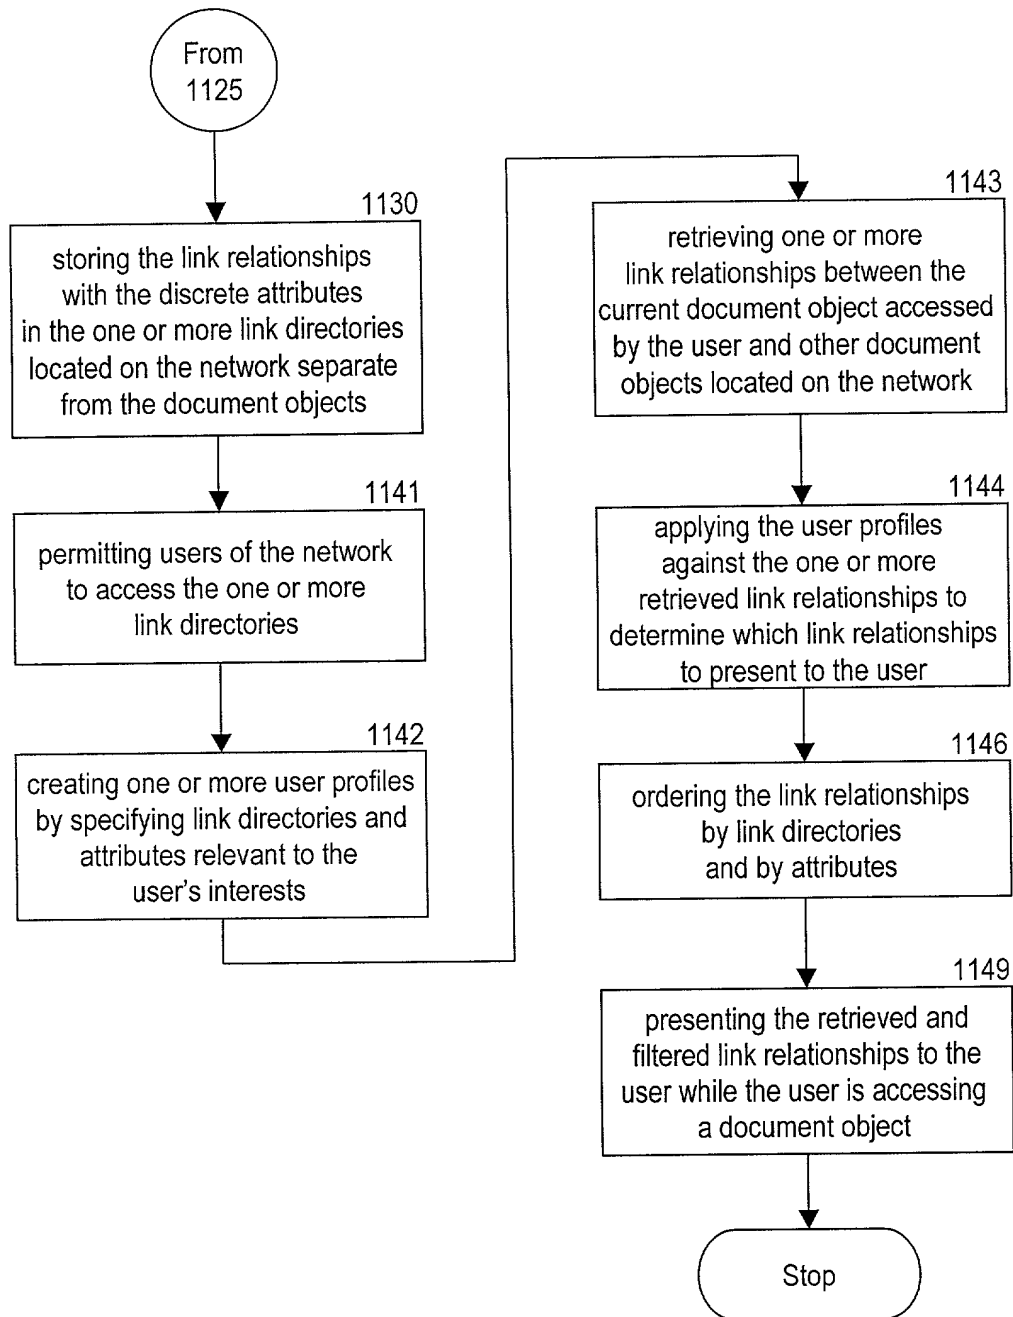

Figure 12 is a screenshot of a software interface for defining LinkSurt Directory Link Attributes. The interface is titled "LinkSurt Directory Name: Wireless Washington" and includes an "Add Attribute" button. Below the title bar, there is a section labeled "LinkSurt Directory Link Attributes" which contains a table with the following columns: Attribute Name, Data Type, Required, and Use Lookup. The table lists various attributes, each with a corresponding data type and a "Use Lookup" checkbox. The attributes are: "Accessible to handicap" (Yes/No), "Activities and Events" (Text), "Exhibits and Tours" (Text), "Sports" (Text), "Daily Special" (Yes/No), "Food" (Text), "Fast Food" (Text), "Menu" (Text), "Restaurants" (Text), "Review" (Text), "Specialty Foods" (Text), "Location" (Text), "Address" (Text), "City" (Text), "Street" (Text), "Zip" (Text), "Geolocation" (Text), "Latitude" (Decimal), and "Longitude" (Decimal). Each attribute has a "Use Lookup" checkbox, and some have a "Dependences" link. The interface also includes a "Values" section for each attribute, where the user can enter the values for the attribute. The interface is labeled with various numbers (1200-1266) indicating different components and elements.
